### PROJECTS LINK

### FEEDBACK

@DanielJ: You consistently ensured data consistency and query accuracy gave our analysis real credibility.

@KossieO: You make working with you easy as a team and off the team. I like how we grow together.

@KaosaraO: I have worked with Rofiah consistently, and I am really in love with her zeal to always grow and learn through her thoroughness in her analysis and detailed insights

### WORK EXPERIENCE

#### MOVIELENS DATASET EXPLORATION

- Tool: Python notebook.
- Merged datasets, converted timestamps, and created new features like release year and genre count.
- Explored data to understand user ratings and movie trends.
- Highlighted six key insights supported by simple visualizations

#### HNG RIDE BUSINESS ANALYSIS

- Tool: PostgreSQL, Excel
- Cleaned and validated ride data, fixing duplicates and wrong values.
- Wrote SQL queries to answer business questions like top rides and revenue growth.
- Identified top-performing drivers and summarized results in a clear report.

#### ELECTION DATA OUTLIER DETECTION

- Tool: Python (GeoCode and GeoSpatial), Excel
- Added geographic coordinates and identified neighbouring polling units.
- Calculated outlier scores to find unusual voting patterns.
- Reported top outlier polling units with possible irregularities.

#### NIGERIAN BANK SEO AND KEYWORD

- Tool: Excel, Power BI, Wordstream.
- Collected and cleaned keyword data on Nigerian banks' online visibility.
- Built Power BI visuals comparing search volume, keyword share, and visibility.
- Identified banks with the strongest SEO performance.

#### INTERNATIONAL FOOTBALL ANALYSIS

- Tool: Power BI, Python.
- Work with the team of Six people to analyze football trend.
- Cleaned and prepared match data covering over a century.
- Created an interactive dashboard showing match outcomes and team trends.
- Shared top insights on dominance, home advantage, and tournament history.

#### PALM OIL PROFITABILITY MODEL

- Tool: Excel, Power BI, Python
- Collected and cleaned data on cost, yield, and palm oil production by state.
- Modelled profit per hectare and estimated ROI and break-even size for ₦1bn target.
- Highlighted top states with the highest profit potential for investors.
